Miller Media Release – Miller Launches New Condor G Series Sprayers

On Tuesday, July 28, 2009, Miller St. Nazianz, Inc. (herein Miller) unveiled a brand new line up of Miller Condor Mechanical Drive Sprayers at the 2010 Model Roll Out Event for Miller dealers.

Branded the G Series, the new Condor G40 and G75 sets a new standard for mechanical drive performance and productivity. Boasting a host of new features and significant product improvements, the G Series delivers to the market a sprayer line more rugged, robust, and productive than ever before.

New features for 2010 include fresh new styling to match the Miller Nitro 4000 sprayers complete with a new all-red color scheme. The major features added for 2010 are listed below.

- Hood and Color:** The G Series Features Fresh New Styling, with a New Hood and Chassis Color Scheme to match the rest of the Miller sprayer products. The new hood fits better with excellent visibility and has the same modern styling of the 4000 Series Nitro line.
- Hood Hinging:** The G Series Hood hinges in the front. The hood is easy to open, providing far better unrestricted access to the engine.
- Spray-Air™:** The Spray-Air™ air boom system can now be added to the G40 series sprayers up to 103' wide, and is now available in a dual-fan configuration up to 120 feet wide on the G75!
- SmartDrive® Front Wheel Assist Option:**
- The G75 can be equipped with the new Poclain SmartDrive® Front Wheel Assist Option featuring On-Demand front wheel assistance.
- Cruise Control:** The G Series Sprayers now feature cruise control as a standard equipment feature.
- High Back Seat:** The G Series Sprayers now feature greater operator comfort with the new High Back Seat in the Deluxe Cab
- Tread Width Bars:** Adjustable “fixed” tread width bars are now available and standard on the G Series Sprayers (when the hydraulic tread width option is not installed).
- Auxiliary Light Kit:** The Aux Light Kit has been expanded to now also include a center section light and two area lamps in addition to the lights presently included with the Aux Light Kit.

- Work Lights:** There are now 4 work lights standard on all G Series Sprayers in the middle of the machine instead of the original 2 lights.
- Toolbox Cowling:** A standard toolbox has been incorporated into the left side cowling.
- 1200 Gallon Tank:** A 1200 Gallon Poly Tank is now available as an option on the G40 when the machine is equipped with drop box rear drives.
- Remote Pump Switch** A remote pump switch has been added as a standard equipment item, previously not available.
- Ground Fill Station** An integrated control panel ground fill station has been developed for the product circuit for a simpler operation and cleaner design.
- Fixed Axle Option:** Coming late in 2009 or early 2010, an economical Fixed Axle Option will be available.

Production on the new Condor G Series sprayers has begun and dealers will be taking delivery of the first units late summer and early fall. Watch for the new G Series at trade shows starting in August, 2009.

High resolution photos are available on request.
