Miller Media Release – Condor Awarded Gold Medal at the 2009 AgroProd Expo in Astana, Kazakhstan

While on display at the 2009 AgroProd Expo in Astana, Kazakhstan, the Miller Condor Series Sprayer, in conjunction with our regional distributor CanAgro Exports Inc., was awarded a Gold Medal.

John W. Miller, President and CEO, Miller-St. Nazianz, Inc., received the award in person. *“I’m pleased to see the Condor Series receive this gold medal award, particularly in Kazakhstan, a country we have been working hard with our distributor CanAgro to introduce our sprayers into. Kazakhstan represents a tremendous opportunity for our business and our products, which makes this award all the more special.”*

The Condor Series sprayers feature a rugged and robust mechanical drive train, boasting operating simplicity, exceptional fuel efficiency, and outstanding productivity. Boasting top-of-the-line components such as Cummins engines and Allison transmissions, reliability and ease of operation make the Condor a popular sprayer with farmers and commercial applicators alike. With tanks from 1000 to 1200 gallons, booms up to 120 feet wide, including Spray-Air air boom technology, and the latest in Precision Farming technology, the Condor Series sprayers set a high standard for mechanical drive performance and productivity.

Miller distributes its entire line of mechanical drive, as well as the four wheel drive Nitro Series sprayers worldwide, throughout North and South America, Australia, New Zealand, Russia, Ukraine, Kazakhstan, Austria, Romania, and Africa.
