THE MILLER COMMITMENT
Miller has been dedicated to making customers more productive since 1899, and our latest generation of Nitro sprayers is no exception. Climb aboard and step into the next level of spraying innovation.

SIT BACK AND RELAX
Miller Nitro SprayView cabs combine comfort with control. The results are obvious. Whether you choose the standard or premium SprayView cab, the hours you’ll spend inside will not seem quite as grueling. From your comfortable vantage point, you’ll confidently see everything you need to without the strain of looking over your shoulder, and the rear-mounted engine reduces noise for even more comfort.
**TIME TO TAKE CHARGE**

Both the standard and premium SprayView cabs provide the controls you need right at your fingertips. The control center is designed to be uncluttered, ergonomic, and easy to master. The Miller Systems Monitor touch screen allows you to control the reversing fan and electric rinse options, foam marker, engine diagnostics, and more.

Regardless of which cab you choose, you will appreciate the sophisticated air-ride suspension, an instructor’s seat, charcoal cab filtration, and more.

**PREMIUM CAB FOR A PREMIUM SPRAYER**

Upgrade to the premium cab to enjoy additional comfort. It includes a Grammer Evolution suede leather, heated and ventilated seat with air-ride suspension and head rest, a leather-wrapped steering wheel, auto climate control, Bluetooth™ XM radio, X Mount for your cell phone, rear view camera and more!
SEE YOUR WORLD  Without ever looking back.

SAVING YOUR NECK

With the Nitro front boom, you can confidently see your work. Visibility and sight lines are so good you’ll see every nozzle, from tip to tip. No guesswork or wondering if all is well, and no craning your neck to see what’s happening behind you. By the end of your long days, you won’t be feeling the worse for wear.
STANDING TALL

Keeping you productive means letting you work as long as you need to—including late into the season. That’s why the Nitro features over six feet of clearance. Since your goal is minimum crop damage while spraying, clearance is critical, as are other Nitro features, such as its even weight distribution, outstanding traction and tight-turning radius. So many variables factor into your productivity calculations. The Nitro tackles them all.

GET ABOVE IT ALL

All-season productivity with over 6 feet of clearance
TURN ON A DIME
4-wheel steer option—the ultimate in maneuverability

With the 4-wheel steer option, you’ll have the tightest turning radius in the business. With front and rear wheels following the same track, crop damage is minimized and headland turning is a snap.
Powerful, efficient Cummins Tier 4B engines provide not just power, but peace of mind, too.

Single-pass cooling system for better efficiency, cooler air flow and easy cleaning.

Direct Drive system on the 5000 series includes: Manual Transmission Control, filtered and cooled oil going through entire drive motor on a continual basis.

Planetary Drive system on the 6000 series includes: Electronic Transmission Control, Traction Control, Cruise Control and Engine Overspeed Protection.
**REVOLUTIONARY PROPULSION SYSTEM**
The all-new Miller Nitro 6000 series features an innovative twin hydrostatic Danfoss pump system with electronically controlled variable displacement piston drive motors and seamlessly integrated Fairfield Torque-Hub® planetary final drives for the optimum drive performance.

**NEW PLANETARY FINAL DRIVES**
The new Torque-Hub® planetary final drives deliver high torque and long life, designed to optimize the performance of the Nitro 6000 series.

**GREATER TORQUE AT ALL SPEEDS**
The new wheel motors provide greater torque at all speeds. From starting out at a standstill, right up to full transport speed, the wheel motors will have the benefit of full torque at all times.

**ELECTRONIC CONTROL**
The Electronic Controller is fast and responsive, and communicates with the sprayer CANbus network in a seamless integration.

**INTEGRATED SPEED LIMITING**
The new Integrated Speed Limiting (ISL) feature allows for hydrostatic braking without overspeeding the engine. This system works with active wet disc service brakes in each drive hub for outstanding stopping power and control.

**NEW FULL-TIME TRACTION CONTROL**
Handle the most challenging field conditions such as mud or soft ground without worry. Each wheel motor’s speed sensor directly communicates with the electronic controller to automatically sense potential slippage and prevent wheels from turning faster or spinning out.

**4 PROGRAMMABLE SPEED RANGES**
The operator is able to set 4 pre-programmed customized speed ranges, with each allowing full travel of the joystick. Common examples may include a slow creep range up to 5 mph for maneuvering in tight places, two working field ranges, and a road transport range.
CRUISE CONTROL
The Nitro 6000 series Cruise Control maintains a set speed by automatically adjusting the wheel motor displacement with a simple joystick setting – no buttons to press.

ANTI-STALL FEATURE
The Electronic Control System is integrated into the Engine Control Module to automatically change the hydrostatic control system in the event of an excessive drop in engine rpm, returning to normal operation when the sprayer is through the problem spot.

NEW TIRE/RIM OPTIONS
The newly designed wheel legs have resulted in new tire options, including:

- Goodyear IF380/90R50 170 UltraSpray TL
- Michelin VF380/90R50 175
- Firestone IF380/105R50 177
- Michelin VF420/95R50 177
- Goodyear 480/80R42 166
- Goodyear IF520/85R42 170
- Goodyear 650/75R42 170

POWER WHEN YOU NEED IT
The Nitro 6000 series sprayers are powered by proven, reliable Cummins® Tier 4B turbo diesel engines.

SMOOTH RIDE
Award-winning suspension = smoothest field trip around

SUSPENSION IS ABOUT MORE THAN COMFORT
The Nitro is known for its great ride, but our HydraLink™ system does so much more. It ensures accurate spraying even at high speeds, less overall machine stress and better boom stability. The all-wheel suspension, connected in an X pattern, gives you a great ride in the toughest conditions, meaning you’ll be covering more acres in a day—and your teeth won’t be rattling at the end of it.
STABLE CHASSIS - STABLE BOOM

For superior tip-to-target spray accuracy and effective pest control

FEED YOUR CORN – WHERE AND WHEN IT NEEDS IT MOST
The Miller Injection Toolbar applies liquid fertilizer between the corn rows and into the soil root zones. It fuels corn growth by applying liquid nitrogen just before maximum uptake and during critical growth periods prior to tasseling.

NO CROP BURNING
Unlike broadcasting liquid or dry fertilizer or applying NH3, the Injection Toolbar incorporates liquid N into the soil to prevent crop burning.

MINIMIZE FERTILIZER LOSS - MANAGE INPUT COSTS
Without sufficient rainfall, 30% of liquid fertilizer may be lost within two weeks of application. With the Injection Toolbar, you can adjust application rates in favorable growing conditions or avoid wasting expensive fertilizer in poor conditions.
ACCURATE DUAL FERTILIZER APPLICATION THAT SAVES TIME AND MINIMIZES COSTS

EASY ON AND OFF — PERFECT FOR SPLIT APPLICATION
The NutraBoss system utilizes a single point hookup on the sprayer boom for fast conversions and minimal cost. Small mounting brackets remain on the boom after the drops are removed, so it’s easy to attach and remove them as needed. It’s ideal for split applications of nitrogen which enhances nutrient efficiency and yields, and reduces the loss of nutrients due to volatilization or leaching.

LIGHTWEIGHT AND RUGGED CONSTRUCTION
NutraBoss components are constructed of stainless steel for corrosion resistance and long life. Each unit weighs only nine pounds, so there is little weight or fatigue on the boom, allowing for widths up to 120 feet.

MOVES EASILY THROUGH CROPS
The double jointed placement tool design moves easily through the crop canopy so you can use the system at different stages of crop growth.

PLACE NUTRIENTS CLOSER TO THE ROOT ZONE
The dual tube distribution provides more accurate product flow. Nutrient liquid is placed on either side of the plant, closer to the root zone, where it can be readily absorbed by plants.

GOOD FOR YOU AND YOUR CROPS
The NutraBoss system allows you to easily and economically apply fertilizer when your crop is in need of nutrients, and places it exactly where it will do the most good — near the plant at the root zone.
FIELD COMPUTERS & PRECISION FARMING

SPRAY-AIR™
The patented Spray-Air nozzle atomizes droplets to your selected size and drives the spray deep into dense canopies. With the Dial-A-Drop™ control, Spray-Air optimizes droplet size for every application without being impacted by speed or pressure changes. Additional Spray-Air benefits include: incredibly low water volume chemical rate usage, superior canopy penetration and coverage, and universal pesticide compatibility.

INTELLISPRAY™
IntelliSpray is a pulse nozzle system that maintains droplet size as the speed of the sprayer changes, resulting in better coverage and less drift. Features include instant on/off, 36 virtual nozzle groups, turn compensation, and optional individual nozzle control.

RAVEN PRECISION
Nitro sprayers can be fitted with Raven Precision Farming straight from the factory. Raven sets the standard with the Viper 4+, AccuBoom, SmarTrax, and UltraGuide boom leveling systems. However, other options are available. Visit your local Miller dealer to learn more.
